

Additional functions that makes using IRIS even more convenient

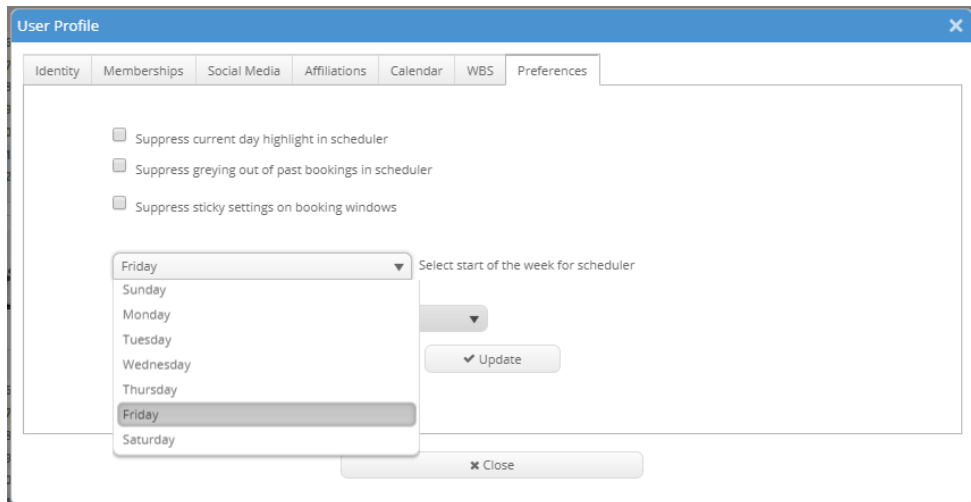

Have schedulers week/ month always start from any preferred day instead of current day.

Go to "User profile" and in there to preferences.

There you can find an option to "Select start of the week for scheduler" click on the drag box and select a preferred day from wich your scheduler will start it's week.

Having it NA will use the current day as start of the week.

Click the drag box and select your preferred starting day for example Monday or Friday
