

Biomathematics Days

The Biomathematics Days are informal full-day seminars involving several research groups working on mathematical ecology and evolution. The series is hosted by the Centre of Excellence in Analysis and Dynamics. The seminars take place in the Exactum building of Kumpula.

All interested are warmly welcome! Participation is free of charge, but prior registration is necessary.

The Biomathematics Days of 2018 will be part of the [EMS Year of Mathematical Biology](#), with a wider circle of participants. Planned dates: 22 May and 22 October 2018.
