

## Erratum

The publisher regrets that errors appeared in the article, “Testing equality of cause-specific hazard rates corresponding to  $m$  competing risks among  $K$  groups,” *Lifetime Data Analysis* vol. 8 pp. 147–161, 2002.

The following sentence on page 152 should be ignored:

Under the alternative, as  $n \rightarrow \infty$ ,  $n^{-1/2}Z$  converges in distribution to  $N_{m \times K}(\underline{\mu}, \Sigma)$ , where

$$\mu_{ki} = \int_0^{\tau_k} \sum_{j=1}^m K_{kij}^o(t) \left[ d\Lambda_{kj}(t) - \frac{\sum_{k=1}^K y_k(t) d\Lambda_{kj}(t)}{y_{\cdot}(t)} \right].$$

Also on page 152, the 12-th line from above should be read as:

Under a suitable sequence of local alternatives, the test statistics has asymptotically noncentral chi-squared distribution with  $m(K - 1)$  degrees of freedom with the non-centrality parameter  $\underline{\mu}' \Sigma^{-1} \underline{\mu}$  where  $\underline{\mu}$  is the corresponding mean vector (see the Appendix for details).
